OneAscent INVESTMENTS

FUND OBJECTIVE

The investment seeks high total return with a shift to current income and some capital preservation over time as the fund approaches and passes the target retirement date. The fund provides diversified exposure to a variety of asset classes, and over time the fund's asset allocation strategy will change. The fund is generally intended for investors expecting to retire around the year 2030 (target retirement date).

FUND STRATEGY

To achieve the fund's objective, the Investment Manager adheres to a well-defined investment process comprised of three primary components - Strategic Allocation, Manager Selection, and Portfolio Monitoring.

Strategic Allocation: Strategic allocation combines OneAscent's long-term capital market assumptions and the target date glidepath. The result is in asset allocation framework with long-term target weightings for each point in the fund's expected lifecycle.

Manager Selection: Investment managers are evaluated using quantitative and qualitative analysis as well as based on their ability to implement OneAscent's values-based screens. OneAscent's quantitative scorecard assesses potential managers against their peer groups and benchmarks in the areas of performance track record, risk management, and cost efficiency. The qualitative evaluation seeks to understand the potential manager's investment philosophy, processes, and people. Current and potential investment managers are continually evaluated for conviction and strategic fit within the investment strategy.

Portfolio Monitoring: The Investment Manager meets regularly to review strategic and tactical allocation decisions and to monitor current investment managers for their ability to create sustaining long-term value.

[4]Prior to the inception date of the OneAscent Target Retirement 2030 Fund (CIT), the investment manager maintained an investment strategy which is used in the CIT. The CIT and the strategy performance represent separate products that employ the same strategy. The strategy performance is primarily shown to give potential investors additional information on how the strategy employed by the CIT has performed over a longer time horizon. The blended strategy performance results shown above reflect both the strategy performance prior to April 1, 2020, and the CIT performance since March 31, 2020. The strategy performance and the CIT performance may differ materially due to fees, participant and portfolio transactions and other factors. The strategy performance does not necessarily represent what investor returns would have been in the CIT. The strategy performance is calculated net of management fees ranging from 23 bps to 31 bps, transaction costs and underlying fund expenses.
